CLUBHOUSE OF THE YEAR:
RENOVATION

HISTORY

The club desired a dedicated member space featuring a destination bar that was sophisticated but relaxed and was regularly available for member use, not having to share duties with event space. This space would preserve their rich history but provide a warm contemporary style.

CONTEMPORARY

The ballrooms were updated in a bright contemporary style while maintaining an elegant and warm inviting space. The bright neutral palate allows the space to conform to a wide array of décor possibilities.

STUNNING

The aging member dining rooms were expanded and opened to the second floor to create a dramatic 2 level member bar and grille experience. With a soaring space over the dining room, the Grill and Mezzanine are visually connected and bring a wonderful lively energy to the space.

EXPANDED

After the removal of many trees, the club became aware of a spectacular vista of the NYC skyline. With no member spaces on the upper level of the clubhouse, it was soon decided that any renovation to the aging structure must include upper-level member space. The expanded outdoor terrace has truly transformed the member experience.

RESULT

The clubhouse was expanded and renovated in the Shaker & Shingle Style to reflect a classic update, unifying the original farmhouse with its many additions over the years. The exterior ties into the warm tones of the interior's rich stained millwork, painted wainscoting, wood flooring, glazed brick, textured tile, and beautiful grass cloth wallcovering for a stunning result which honors tradition.
